Kyiv, Ukraine/Remote

Summary

I am a responsible, detail-oriented Fullstack developer with a passion for continuous improvement. Proficient in JavaScript, TypeScript, HTML, CSS, React, and Node.js, I hold a Master's Degree in Cybersecurity. During my Computer Science studies, I gained foundational knowledge in MongoDB, C, and C++.

My strengths lie in perseverance and diligence, as I tackle challenges with personal dedication. I was involved in digital art and drew 1 art about my favorite fictional universe. I posted this art on Reddit in a thematic group and in 2 days this art collected more than 1500 upvotes. Moreover, I am known for being the first to arrive and the last to leave, as my commitment extends to the gym.

Currently seeking a FrontEnd/Fullstack Developer position, I am eager to enhance both my technical and soft skills both in Ukrainian & international teams (with the help of my Upper Intermediate level of English).

RELEVANT SKILLS

- **Languages:** JavaScript (ES6), TypeScript
- **Frameworks:** React.js, Node.js, Express
- **Technologies:** HTML5, CSS3, SASS(SCSS), JSON, BUG, Redux Toolkit, Mongoose, Sequelize
- **Methodologies:** Pixel-perfect, BEM, Cross-browser and adaptive layout, REST API
- **UI library:** MUI, Tailwind
- **Tools:** Figma, Git, Photoshop, NPM, Webpack, ESLint
- **Algorithms:** Solved 200+ algorithmic tasks
- **Basic OOP understanding**
- **Basic PHP, C, and C++ knowledge**
- **English:** Upper intermediate

EDUCATION HISTORY

National Aviation University | 2021 - 2022
Master's Degree in Cybersecurity

Volyn National University | 2018 - 2021
Bachelor's Degree in Computer Science

WORK EXPERIENCE

Full Stack Developer

Freelance,

Kyiv, Kyiv City, Ukraine · Remote

Apr 2023 - Present (6 months)

- Developed UI and API for Music Studio website on customer's requirements. Website has responsive design and user-friendly interface. API relies on MongoDB database and has login/sign up functionality.
- Created new and modified existing websites using JavaScript, HTML, and CSS, and implemented web applications, using modern technologies (JavaScript, React, Redux, Typescript);
- Performed user interface design based on product requirements, as well as creating reusable components and working with UI libraries for further use;
- Performed code reviews, investigated, reproduced, and fixed defects, and communicated with external web services;
- Attended regular Zoom meetings with the team and actively worked in a team and communicated with team members to achieve development goals.

SELF-EDUCATION

- [Practical React Course, SoftServe](#)
- [Node.js, Express, MongoDB & More: The Complete Bootcamp 2023, Udemy](#)
- [The Complete JavaScript Course 2022: From Zero to Expert, Udemy](#)
- [Basics of software testing course, Prometheus \(2021\)](#)
- [Media literacy: practical skills course, Prometheus \(2020\)](#)
- [Basics of information security course, Prometheus \(2019\)](#)
- [Codewars.com\(near 40 tasks\)](#)

ACHIEVEMENTS

- 100+ Algorithmic Tasks solved during the last month
- After finishing my bachelor's degree, my professors suggested me to join a university programming contest. I secured first place by developing a software implementation of book encryption.
- Created a full-stack project in TypeScript, React.js, and Node.js as my master's thesis
- Was involved in digital art and drew 1 art about my favorite fictional universe. I posted this art on Reddit in a thematic group and in 2 days this art collected more than 1500 upvotes.

RECENT PROJECTS

- **Nice Gadgets** - react group project. Gadget's store with our own API. The website has catalog for each category, details, favorites, cart pages.
Role: Frontend developer
[Demo](#)(Need to wait little bit) | [Code](#)
